CI/CD Pipeline

We use Continuous Integration (CI) to make regular changes to the code for quicker resolution of bugs. Continuous Deployment or Continuous Delivery (CD) is to make sure the code is ready to be deployed.

- Spend more time on application and less on fixing integrations and deployments
- Click to Build with confidence and deploy to right set of device with right configuration
- QA, Acceptance testing at every stage to ensure quality
- Feedback loop to ensure pipeline's operational health
- Frequent code pushes with real-time monitoring of your pipeline

Cloud Computing

As a small or medium-sized business, you can easily reduce the cost of buying & maintaining physical IT infrastructure by storing, creating backups & recovering your valuable business data on the cloud. SoftSages provides cloud services for all three levels of cloud solutions according to clients' need.

- Infrastructure as a Service (IaaS)
- Platform as a Service (PaaS)
- Software as a Service (SaaS)
